

HEAD-MOUNTABLE DISPLAY SYSTEM

ABSTRACT OF THE DISCLOSURE

Various embodiments of a head-mountable display system can be adapted to allow users to see through or above or below the display assembly. Such range of vision
5 can be achieved by positioning the display assembly into display pods housed in clear plastic; forming the frame into an “S”-shape positioned on the bridge of the nose so as to allow the user to see over it; positioning retractable display pods into a hard support frame, or other means. Various parts of the head-mountable display system, such as temple arms, ear phones, display assembly, and the head band, can be modified so as to
10 achieve ergonomically optimal solution.
